“We created extraLUX for customers with extreme low-light requirements,” said Paul Kong, Technical Director, Hanwha Techwin America. “This is the best low-light camera we have ever produced. Unlike typical low-light, noisy IR black and white images of the past, our extraLUX cameras generate minimal noise, allowing customers to see color images at night.”

extraLUX is now available in the XNB-6005, XNO-6085R (bullet), XNV-6085 (outdoor dome), and XND-6085 (indoor dome) X series cameras. These cameras include a motorized vari-focal lens (4.1mm ~16.4mm) which will allow the user to remotely zoom in/out and focus. The XND-6085 and XNV-6085 both feature full PTRZ (Pan, Tilt, Zoom and Rotate) for additional control and positioning. The XNB-6005 box camera also features a ½” sensor and a choice of lens configurations including an Intelligent CS (I-CS) lens that communicates its position, iris, and focus directly to the camera for more accurate and fast image adjustments.

Additionally, the XNO-6085R, XNV-6085, XND-6085 and the XNB-6005 features a built-in gyro sensor for digital image stabilization which provides more accurate stable image when turned on in an environment that causes the camera to shake. For illuminating distant objects, the XNO-6085R has built-in IR that reaches 229 feet (70m).

Wisenet X series cameras feature Wisenet 5 technology providing 150dB Wide Dynamic Range (WDR), a comprehensive suite of license-free built-in analytics, enhanced device security, and better compression and data transfer performance via Hanwha's embedded WiseStream II compression technology and H.265 high efficiency encoding.

About Hanwha Techwin America

Hanwha Techwin America is the U.S. subsidiary of Hanwha Techwin, a South Korean based company. Hanwha Techwin is a leading global supplier of solutions for IP and analog video surveillance. Building on the company's history of innovation, Hanwha Techwin America is dedicated to providing solutions with the highest levels of performance, reliability and cost-efficiency for professional security applications, such as continuing development in advanced edge devices and video analytics. For more information, visit www.HanwhaSecurity.com.
