Las Vegas, NV.

## Hanwha Techwin Releases New Corner Mount Camera

*Housing and technology focused on the unique needs of correctional facilities*

**Teaneck, NJ, September 20th, 2018** - At GSX 2018, in booth #2341, [Hanwha Techwin America](#), a global supplier of IP and analog video surveillance solutions, will unveil the new Wisenet TNV-7010RC corner mount camera. Focused on the unique needs of correctional facilities and detention centers, the IP-based camera features a corner mount design that provides broad room coverage. IR (infrared) is emitted at a higher wavelength than traditional 'red glowing' IR emitters, making it invisible to the human eye so as not to disturb inmates at night.

The Wisenet TNV-7010RC camera features a 3MP sensor that captures video at up to 30fps so details are preserved. Wisenet WDR supplies 120 dB of wide dynamic range so detail can be discerned in both brightly lit and shaded areas of a room.

The TNV-7010RC housing is vandal resistant with an IK10+ rating and also includes shock detection to alert operators if the camera is subject to abuse. Ingress protection

is rated at IP66 and IP6K9K. In addition to shock detection, a built-in suite of Wisenet video and analytics is also included featuring Tampering, Loitering, Directional Detection, Defocus Detection, Fog Detection, Virtual Line, Enter/Exit, Appear / Disappear, Audio Detection, Face Detection, Motion Detection, and Sound Classification.

"For the TNV-70190RC we choose a 940nm IR emitter that illuminates to 32.8 feet. This wavelength can't be seen by humans unlike the 850nm emitter utilized by most cameras which results in the traditional red glow," said Paul Kong, Technical Director, Hanwha Techwin. "We've received feedback from the corrections market that this provides a much better atmosphere in cases of 24/7 surveillance."

Additional features particularly applicable for in-cell use include a built-in microphone and audio line out for two-way communication. Multiple privacy-masking zones can also be configured.
