“WE MOVE with trust”

Hanwha Techwin Hosts ONVIF Developers' Plugfest & F2F Technical Meeting

Seoul, South Korea (November 10, 2017) – Hanwha Techwin America, a global supplier of IP and analog video surveillance solutions, hosted the 17th ONVIF Developers Plugfest in The Plaza Hotel, Seoul, South Korea on November 8 – 10, 2017. As a ‘Local Sponsor’, Hanwha Techwin supported the opportunity for manufacturers participating in the Plugfest to test their devices for conformance to the ONVIF standard. This included simulating real-life scenarios in order to assess the level of interoperability of different manufacturers’ devices operating simultaneously as part of a single system.

ONVIF, a non-profit founded in 2008, is a leader in the global standardization initiative for IP-based physical security products. Its members include manufacturers, systems integrators, end users, members of the security media, specifiers and other security professionals. With integrated systems increasingly involving solutions from multiple manufacturers, ONVIF's Plugfest events are important to the electronic security industry as they bring together technical experts in order to test device compatibility and agree on up-to-date industrial standardization of interfaces.

Standardization

During the Plugfest, around 20 global video surveillance and physical access control manufacturers conducted peer-to-peer tests of devices under development to see how well they interacted with each other. This identifies limitations before a product is launched. Hanwha Techwin took the opportunity to test its cameras, recorders and Smart Security Manager (SSM) software platform to ensure compatibility with other manufacturers' products.

F2F Technical Meeting

Hanwha Techwin will host the F2F (Face-to-Face) technical meeting from November 13 – 16, 2017 following the Plugfest. F2F Technical Meeting session focused on the development of profiles and specifications including conformance and the ONVIF Test Tools. It is performed after the engineers' testing session, and ONVIF Full and Contributing members are invited to this meeting.

Hanwha Techwin has been a full member of ONVIF since 2009 and has actively participated in activities such as forums to build industrial standardization. The 17th Developers Plugfest is particularly significant to the company as its Senior Engineer, Sujith Raman, has been recognized for his contribution to the development of ONVIF protocol development and he has been recently elected with honor to the organization's technical committee.

Hanwha Techwin is delighted to demonstrate support for ONVIF's objectives. Hanwha is committed to the process of the mutual exchange of technical knowledge with other members. The company will share, listen, talk and grow together with global partners for the benefit of mutual customers.

About Hanwha Techwin

Hanwha Techwin America is the U.S. subsidiary of Hanwha Techwin, a South Korean based company. Hanwha Techwin is a leading global supplier of solutions for IP and analog video surveillance. Building on the company's history of innovation, Hanwha Techwin America is dedicated to providing solutions with the highest levels of performance, reliability and cost-efficiency for professional security applications, such as continuing development in advanced edge devices and video analytics.
