Booth #2341

23-27 September 2018

Las Vegas, NV.

## **Hanwha Techwin Enhances its Wisenet Q series with New Affordable Cameras and NVRs at GSX 2018**

*Offers simple and essential features that are ideal for securing small to medium sized businesses*

**Teaneck, NJ, September 21, 2018** - At GSX 2018, in booth #2341, [\*\*Hanwha Techwin America\*\*](#), a global supplier of IP and analog video surveillance solutions, will enhance its Wisenet Q series line of cameras with new affordable flat-eye cameras and NVRs. Scheduled for September 2018 release, the new cameras and recorders offer simple and essential features that are ideal for small to medium sized applications.

### **Wisenet Q series Cameras:**

The Wisenet Q series offers a range of indoor and outdoor dome cameras to meet the needs of a variety of customers looking for sharp and clear image quality at an affordable price, including retail, banking, offices, transportation and more. Available in 2MP and 4MP resolutions, the new flat-eye cameras feature motorized vari-focal lenses, WiseStream and H.265 for improved bandwidth efficiency, 120dB WDR (wide

dynamic range), defocus detection, reduced IR reflection and PoE power. The four new models include:

- QNE-7080RV: 4MP @ 20fps, motorized vari-focal, ivory color
- QNE-7080RVW: 4MP @ 20fps, motorized vari-focal, white color
- QNE-6080RV: 2MP @ 30fps, motorized vari-focal, ivory color
- QNE-6080RVW: 2MP @ 30fps, motorized vari-focal, white color

### **Wisenet Q Series NVRs**

The new QRN NVRs provide high-performance, yet cost-effective recording solutions for smaller installations such as offices and retailers. Customers can save on both installation costs and time by using the Wisenet Q series cameras together with the new Wisenet Q series PoE NVRs (Network Video Recorders). The PoE ports negate the need for the provision of separate power cables and plug points for each camera or the need for an external PoE switch.

Just like the cameras in the Wisenet Q series, the new QRN NVRs support Hanwha's WiseStream compression technology to improve bandwidth and storage efficiency for high resolution images. The QRN-410S 4 channel models support 40Mbps network camera recording. The 8 channel QRN-810S models can record up to 80Mbps, while the 16 channel QRN-1610S models can record up to 128Mbps.

The QRN NVRs provide easy remote access configuration via the Wisenet Mobile App using a QR code. The recorders are fully compatible with Wisenet WAVE VMS (Video Management Software), an extremely easy-to-use and scalable software solution that maximizes the efficiency of Wisenet network cameras and provides the option to seamlessly monitor, expand, and scale its systems.
